POLY CLIP - FCA 90 AUTOMATIC DOUBLE CLIPPING MACHINE

QUOTATION NO: Q20261115-986
DATE: 15.11.2026

PRODUCT DESCRIPTION

Specifications and product characteristics:

- The Poly Clip FCA 90 automatic double clipper offers unrivalled versatility and performance, engineered to meet the rigorous demands of the modern meat processing industry. This model boasts exclusive PCS (Poly-clip System) features, proudly holding the title of the world's fastest automatic machine for moulded products, while also featuring an automatic central lubrication system that drastically reduces maintenance requirements. The machine can achieve speeds of up to 126 cycles per minute in continuous mode, comfortably handling a broad calibre range from 38 to 160 mm.
- The FCA 90 reliably processes a wide variety of items, including chubs, cold cuts, and ham with low injection rates. Its versatility is highlighted by its ability to close collagen casings (up to 90 mm), fibrous casings (up to 120 mm), and plastic casings (up to 160 mm, depending on material thickness). The specialized voiding separator and optimized clip shape ensure short sausage shoulders, yielding more usable slices per sausage. Furthermore, this machine is capable of processing shaped products up to an impressive 1,800 mm in length, with the optional addition of a hanging loop on either the left or right side.
- Technical Specifications:
- Manufacturer: Poly-clip System
- Model: FCA 90
- Type: Automatic double clipping machine
- Capacity / Speed: Up to 126 cycles per minute (continuous mode)
- Calibre Range: 38 – 160 mm
- Casing Compatibility: Collagen (up to 90 mm), fibrous (up to 120 mm), and plastic casings (up to 160 mm)
- Total Spreading: Up to 300 mm (for moulded products)
- Max Shaped Product Length: Up to 1,800 mm
- Exclusive Features: Automatic central lubrication, world's fastest machine for moulded products
- Optional Features: Loop placement on the left or right side
- Application: Industrial production of chubs, cold cuts, ham, and moulded meat products
